

Gernsbach Mill

The Gernsbach mill was established in 1841 and has been involved in the production of cartonboard since 1951. The recycled fibre-based cartonboard grades, including Supra and Silbergrau, are produced at Gernsbach and are ideally suited to food and non-food packaging applications.

The Gernsbach mill combines state-of-the-art technology and processes with a highly skilled and knowledgeable workforce. Environmental protection is an important priority at Gernsbach and has been for many years. Measures to protect the environment are not just limited to production but also include upstream and downstream areas of the supply chain, including purchasing and logistics.

Finishing Equipment

We supply our products in the following formats:

Formats	KM2
minimum (in mm)	400 x 600
maximum (in mm)	1200 x 1600+
Reels	
minimum width (in mm)	250
maximum width (in mm)	1800
maximum weight (in kg)	2300
Outer diameter	
minimum	900
maximum	1800
Core diameter (in mm)	100/120/150/200/300

Machine specifications

	KM2
Machine width	330 cm
Substances (gsm)	250 - 600
Caliper (µm)	310 - 830
Qualities	GT, GD, GK
Top coating	Blade
Formers	4 fourdriniers

Mill Certificates

- FSC
- ISO 9001
- Isega on request
- ISO 50001:2011
- HACCP
- HALAL

Products

- MCM Gernsbach
- Printa
- Silbergrau
