

# Hirschwang Mill

Hirschwang mill is a well-established producer of recycled fibre-based cartonboard, and is well known for having the first cylinder board machine commissioned in Austria. This was in 1903. Alongside the standard cartonboard grade produced from 100% recycling material, the mill specialises in the production of blister applications, skin packaging and thermoformed cartonboard.

The Hirschwang mill combines state-of-the-art technology and processes with a highly skilled and knowledgeable workforce. Environmental protection is an important priority at the Hirschwang mill. Measures to protect the environment are not just limited to production but also include upstream and downstream areas of the supply chain, including purchasing and logistics.

## Finishing Equipment

We supply our products in the following formats:

| Formats                | KM4            |
|------------------------|----------------|
| minimum (in mm)        | 400 x 600      |
| maximum (in mm)        | 1200 x 1600    |
| Reels                  |                |
| minimum width (in mm)  | 150            |
| maximum width (in mm)  | 2160           |
| maximum weight (in kg) | 3500           |
| Outer diameter         |                |
| minimum                | 700            |
| maximum                | 1800           |
| Core diameter (in mm)  | 70/120/150/300 |

## Machine specifications

|                  | KM4                |
|------------------|--------------------|
| Machine width    | 216 cm             |
| Substances (gsm) | 400 - 700          |
| Caliper (µm)     | 530 - 970          |
| Qualities        | GT, GD, GK         |
| Top coating      | Blade              |
| Formers          | 10 cylinder moulds |

## Mill Certificates

- FSC
- ISO 9001
- ISO 14001
- HACCP
- EMAS
- HALAL
- Isega on request

## Products

- MCM (Austria)
- MCS (Austria)
- MCB (Austria)
- GK 33 (specification on request)
