

Maule Mill

Cartulinas CMPC S.A. has been manufacturing and selling high stiffness, white and smooth folding boxboard of varying weights and specifications since 1951. The company operates two mills, one located close to the city of Valdivia in Southern Chile and the other in the Maule region, with an annual production capacity of 430,000 tonnes.

Maule Mill was built using state-of-the-art technology, both in production and in care for the environment. This commitment to the environment was clearly demonstrated when the company undertook an Environment Impact study in advance of the mill being built. This study was submitted to the Environmental Regional

Commission (COREMA) prior to approval being granted to build the mill. Maule Mill has achieved FSC and PEFC certification

Since virgin fibres are used in the manufacturing of products at Maule Mill, they can safely come into contact with foodstuffs, as acknowledged by ISEGA and HACCP certification. In addition Maule Mill has received ISO 9001:2000 and ISO 14001:2004 certification, which clearly demonstrates the mill's commitment to the quality of its products and the protection of the environment.

Nearly 85% of the mill's production is shipped overseas to more than 50 countries across 5 continents.
