

Neuss Mill

The Neuss mill was set up in the year 1911 and has the biggest and most modern recycled fibre cartonboard machine in Europe. The recycled fibre-based cartonboard grades, produced at the Neuss mill, are ideally suited to food and non-food packaging applications. With its three liner grades, Neuss ranks among the leading liner manufacturers in Europe.

The Neuss mill combines state-of-the-art technology and processes with a highly skilled and knowledgeable workforce. Environmental protection is an important priority at Neuss and has been for many years. Measures to protect the environment are not just limited to production but also include upstream and downstream areas of the supply chain, including purchasing and logistics.

Finishing Equipment

We supply our products in the following formats:

Formats	KM5
minimum (in mm)	420 x 500
maximum (in mm)	1200 x 1620
Reels	
minimum width (in mm)	500
maximum width (in mm)	2800
maximum weight (in kg)	3500
Outer diameter	
minimum	950
maximum	1800
Core diameter (in mm)	76/100/150/200/300

Machine specifications

	KM5
Machine width	515 cm
Substances (gsm)	145 - 380
Caliper (µm)	165 - 535
Qualities	GD, LIN
Top coating	Blade
Formers	4 fourdriniers

Mill Certificates

- FSC
- HACCP
- Isega on request
- ISO 50001:2011
- ISO 9001
- HALAL

Products

- MCM Neuss
- MCS Neuss
- MM Liner
- ACM
- ACM HS
